

Durable insulated containers

Moving temperature sensitive products is challenging. Whether it's food, pharmaceuticals or any other product, you need to make sure the integrity and value of your product arrives at its destination intact. ThermoSafe are experts in the design and manufacture of products which help simplify your business and safeguard your product.

FOR DISTRIBUTION

Durable containers are designed to keep your product at the correct temperature without mechanical refrigeration right up until delivery and are tough enough to cope with the harshest of environments.

- Double-wall polyethylene construction filled with custom formulated urethane foam insulation provides exceptional temperature control.
- Reduces the need for expensive temperature controlled transportation as frozen products can be shipped on refrigerated or dry trucks.
- Provides flexibility for LTL shipments of mixed loads where some products need temperature control.
- So many designs for you to choose from to suit your particular application. Take a look at the back page to see all the options. Thermal Performance data is available for some models.
- We divide our Durables into Chest and Upright to help you zone in on what works best for you.
- Chest style are best suited for bulk storage and transportation of refrigerated or frozen product.
- Upright styles are ideal for frozen or refrigerated food storage and distribution where easy access is important.

HR11P3

Holds up to 570lb (258.4kg)
of Dry Ice Pellets

HR27P3

US pallet footprint

HR54P

Thermal Test
Data Available

Perfect for ice cream storage

Specification Overview

Size	Model	External Dims (l x w x h)		Internal Dims (l x w x h)		Tare Weight		Internal Capacity		Dry Ice Capacity Block/Pellet
